

CWorks FAQ

Technical Queries

1) I am using Cworks Free Version, when I print out my work orders using the Print WO1 tab, it doesn't show the details?

A: The Cworks Free version does not enable you to print out the details of a work order. The function of Print WO1 is to enable the user to print out an empty work order form before the work is carried out. The details of the work orders can be printed using the Print WO2 tab. But that tab is only available for the paid versions.
