## HEALTH AND SAFETY COMPLIANCE IN THE WORKPLACE HAS NEVER BEEN MORE IMPORTANT...

You want to work safely, your wellness is important!!!

Adhering to the common statement quoted by Jeff Cooper, "Safety is something that happens between your ears, not something you hold in your hands."

We often recognized maintenance department as **one of the** caretaker of company safety and its important for maintenance department to;

1. Learn to recognize both normal and abnormal equipment behavior and check material safety data sheets regularly.
2. Taking a first-aid/CPR course to broaden their knowledge of safety training
3. All works to be done according to internal/plant safety procedure
4. Learn how to operate an emergency workstation and where they are located in the plant
5. Emphasize overall wellness
6. To stay fit, many companies now provide opportunities for their employees to elevate personal fitness level by offering fitness membership and etc
7. It's proven that exercise and relief programs reduce stress and improve physical health
